The Leucine-responsive regulatory protein (Lrp) is thought to regulate the expression of multiple genes and operons in bacteria. Two strains \textit{lrp+} and \textit{lrp-} were studied to investigate which genes are subject to changes in expression levels.

The raw data were taken from CyberT website. The data for 8 chips (4 \textit{lrp+} and 4 \textit{lrp-}).
Format

An AffyBatch of 8 samples.
